Create Property

Steps:

1. The management company inputs all the property info.
2. The management company uploads the condo files.
3. The management company presses the Create Property Button.
4. The management company closes the confirmation modal.
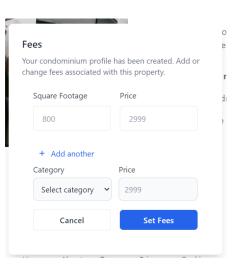

US-1.3: REN-12-Enter-condo-fees-to-set-costs

As a condominimum management company, I want to be able to enter condo fees per sqft, parking spot fees or any other cutom fees for my units to set the costs for tenants/owners.

This button below will appear on the page with all the condos managed by the company. Clicking it will make a popup modal appear.
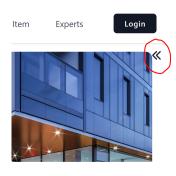

This popup allows for the condo company to set the condo's square footage and the price. Price/sqft will automatically be calculated.

Additional fees can be added by clicking the "+ Add another" button. This adds a dropdown with categories "Parking" and "other" along with a matching "Price" number field

US-1.4: REN-13-present-the-fees-to-the-owners

As a user, I want to be able to see the eventual "Purchases" or "Reservations" that interest me. So, a "Shopping Cart" is provided for that purpose. The actual content of the Cart is to be developed. However, for now it's completely functional and saves as cache.

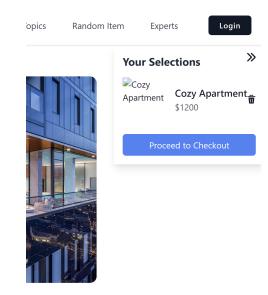

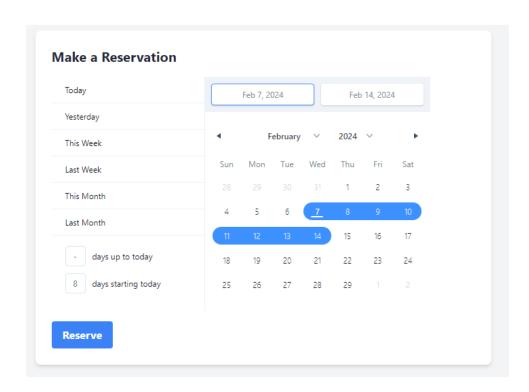

Steps:

1. The Cart is also available at all times for the user to check, presented as two left-pointing arrows.
2. Clicking on these arrows opens the cart for the user to check exactly what he chose.
3. The arrows become right-pointing, as if to indicate that he can hide the cart again.

US-1.5: As a company, I want to set up common facilities for occupants to make reservations

As a company, we're launching a "Facilities Booking" feature to allow occupants to easily reserve common facilities. This streamlined system offers a calendar view, facility details, and real-time availability for efficient scheduling. It's designed for simplicity, enabling quick bookings for meeting rooms, event spaces, and more.

Cozy Apartment

Cozy Apartment
$1200

Proceed to Checkout

Steps:

1. Chose your preferred date for reservation of a common facility
2. Simply click on the reserve button, and voila!

US-1.6: As an occupant, I want to create a profile to link it to my unit and have access to the services associated to my unit.

As an occupant, I seek to establish a profile that connects to my unit, granting me access to associated services. This setup facilitates personalized service utilization.

Steps:

1. The occupant can view any property he/she is renting in this table.

2. Clicking on the Services on the right of the table shows to services associated with the property.

3. Clicking on the + button on the top right allows you to add a new property to the table.

US-1.7: As an owner, I want to have a dashboard of my properties to see their details.

As an owner, I want a dashboard for my properties, enabling me to view their details at a glance. This feature ensures easy management and oversight.
